DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: --A METHOD OF PRODUCING A
PIEZOELECTRIC ELEMENT--.

Claim Objections

2. Claims 2-11 are objected to because of the following informalities:

Re. Claims 2-11: The phrase "A method" as recited in line 1 changes to --The method--.

Re. Claim 2: The phrase "an electrode paste" as recited in line 2 appears to be --the electrode paste--.

Re. Claim 5: The phrases "a conductor" and "an insulator" as recited in line 2 appear to be --the conductor-- and --the insulator--.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3729

4. Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per claim 1 the phrase "the C axes of the piezoelectric body materials are oriented substantially parallel to the lamination direction of the laminate, and polarizing the fired laminate substantially perpendicular to the orientation direction of the C axes" as recited in lines 10-14 renders the claim vague and indefinite. It is unclear as to what the C axes of the piezoelectric body materials are indicated. In addition the phrase "the C axes" as recited in line 10 lacks antecedent basis.

Allowable Subject Matter

5. Claims 1-11 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

6. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to disclose the claimed invention such as laminating the piezoelectric body having perovskite structure and the C axes of the piezoelectric body materials are oriented substantially parallel to the lamination direction of the laminate, and polarizing the fired laminate substantially perpendicular to the orientation direction of the C axes.

Art Unit: 3729
